

interzum award 2001

product description: wellium

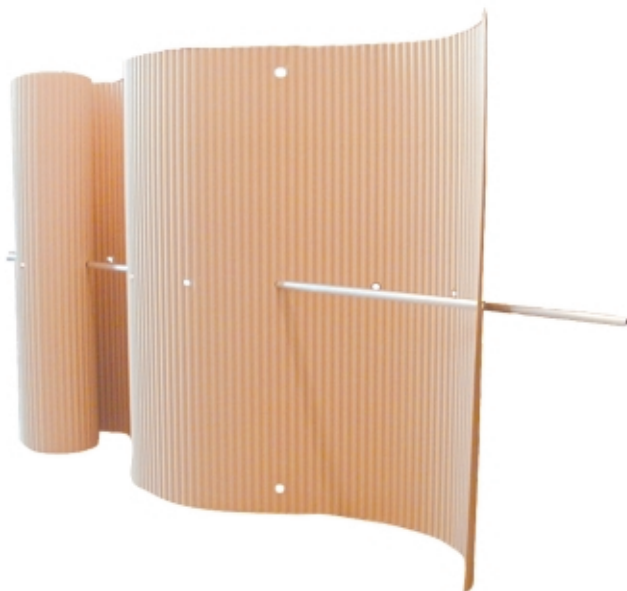

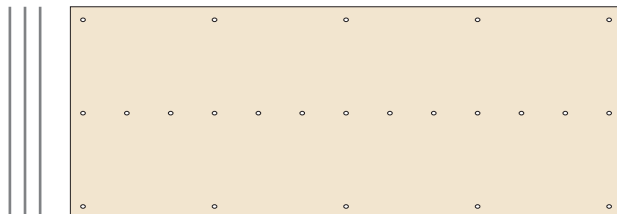

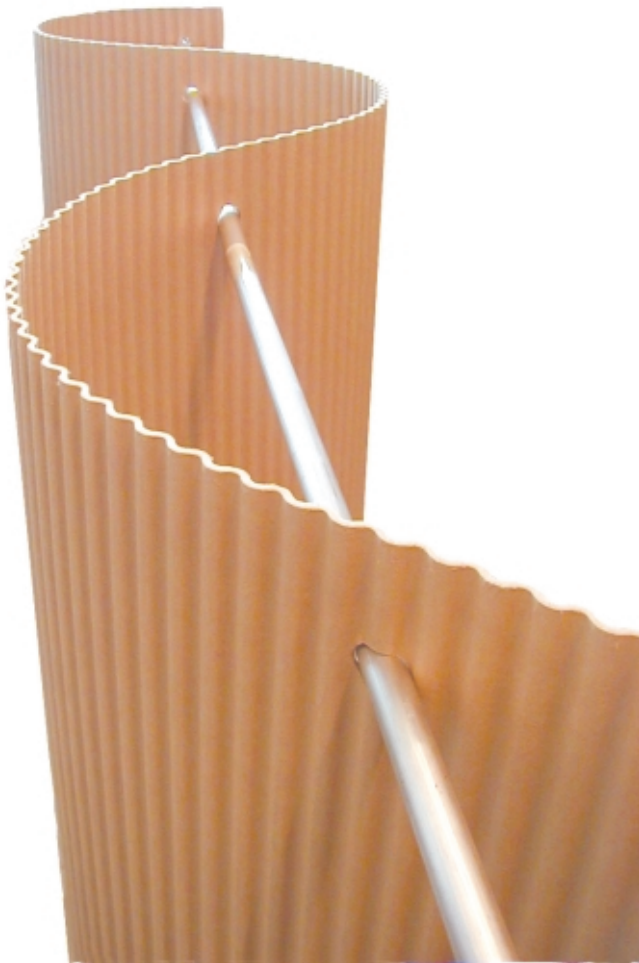

wellium a light and flexible furniture system which brings a new look to home furnishings!

the wellium system is created from wellboard and tubes of aluminium. it can be arranged in various ways, as required. the board has a size of 90 x 260 cm and comes cut with oval holes. the aluminium tubes can be fitted using these holes. alternatively, the holes can be used for attaching the board to the wall.

standing on the floor wellium can be used as a windbreak or a screen or as the base for tables or sideboards. fixed on to the wall it can be used as a wardrobe or shelves. due to its easy handling it can be used for various applications - the user's imagination will know no limitation!

wellboard medium, which is made of 100 % cellulose, is the source material for wellium. it is totally environmentally friendly and is ideally suited for use in the living area. after assembly, wellium takes on its own natural looking wave shape.
